Typical Corporate Source Index Listing

Listings in this index are arranged alphabetically by corporate source. Titles, without title extensions, are provided under each corporate source entry. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The issue and page number identify the *STAR* issue in which the document was announced and the page on which the citation appears. The accession number denotes the number by which the citation is identified on that page. The listings are arranged under each personal author in ascending accession number order.
